1 URL domain regisrtrar variation analysis

Author: Pekka Helenius, 2021

- Analyzes given URLs and stores results into a new JSON data file
- Outputs associated domain registrars for each input URL as a plot
 - "Phishing campaigns register domains of websites from the same registrar (than the legitimate URL)"

```
URL data: https://hoxhunt.com/
URL data: https://hs.fi
URL data: https://ts.fi
URL data: https://facebook.com
Generate statistics: https://hoxhunt.com/
```
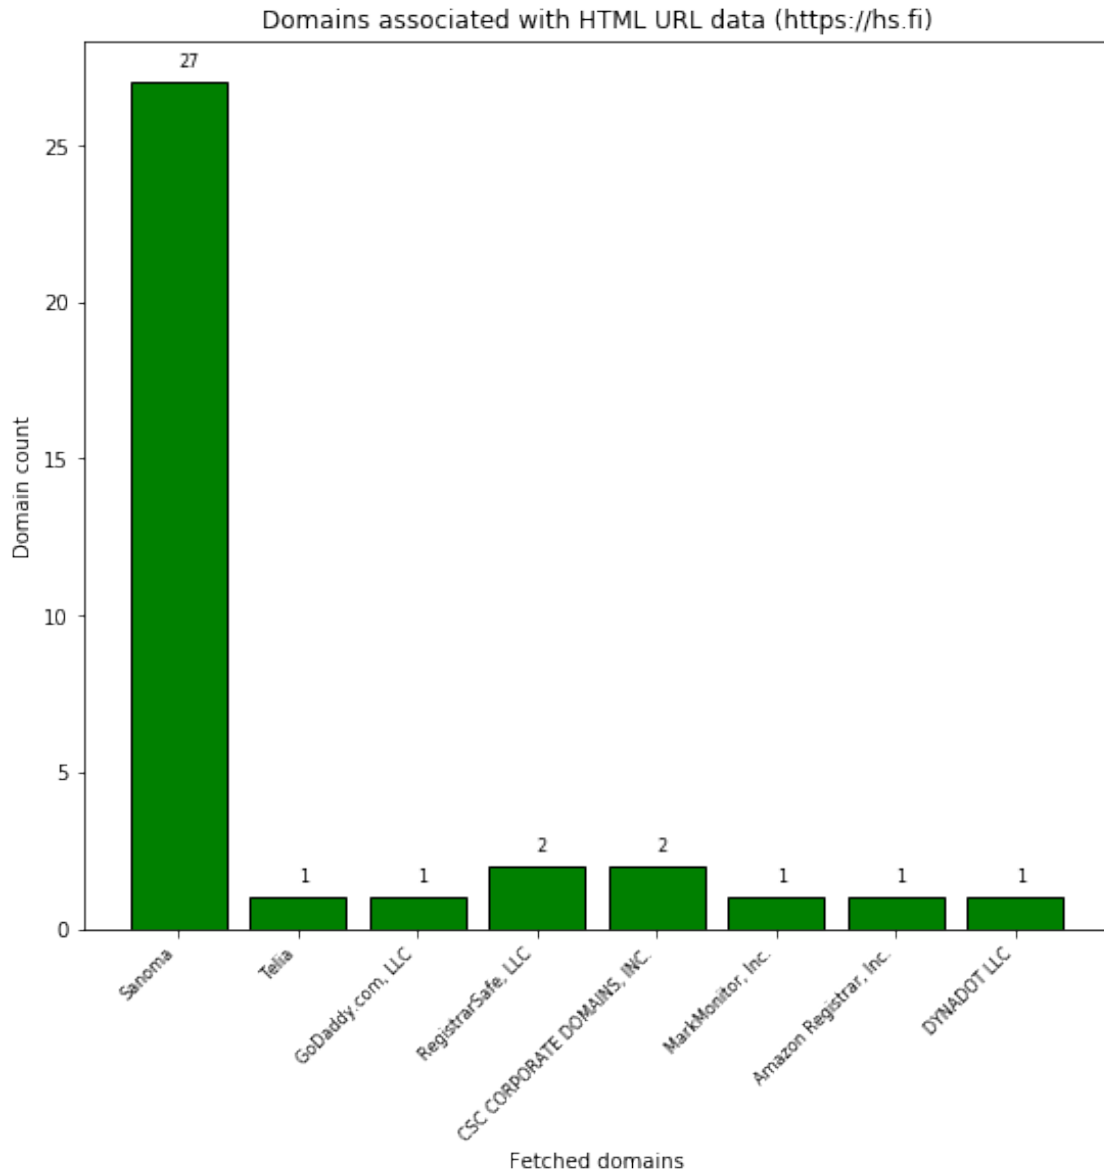

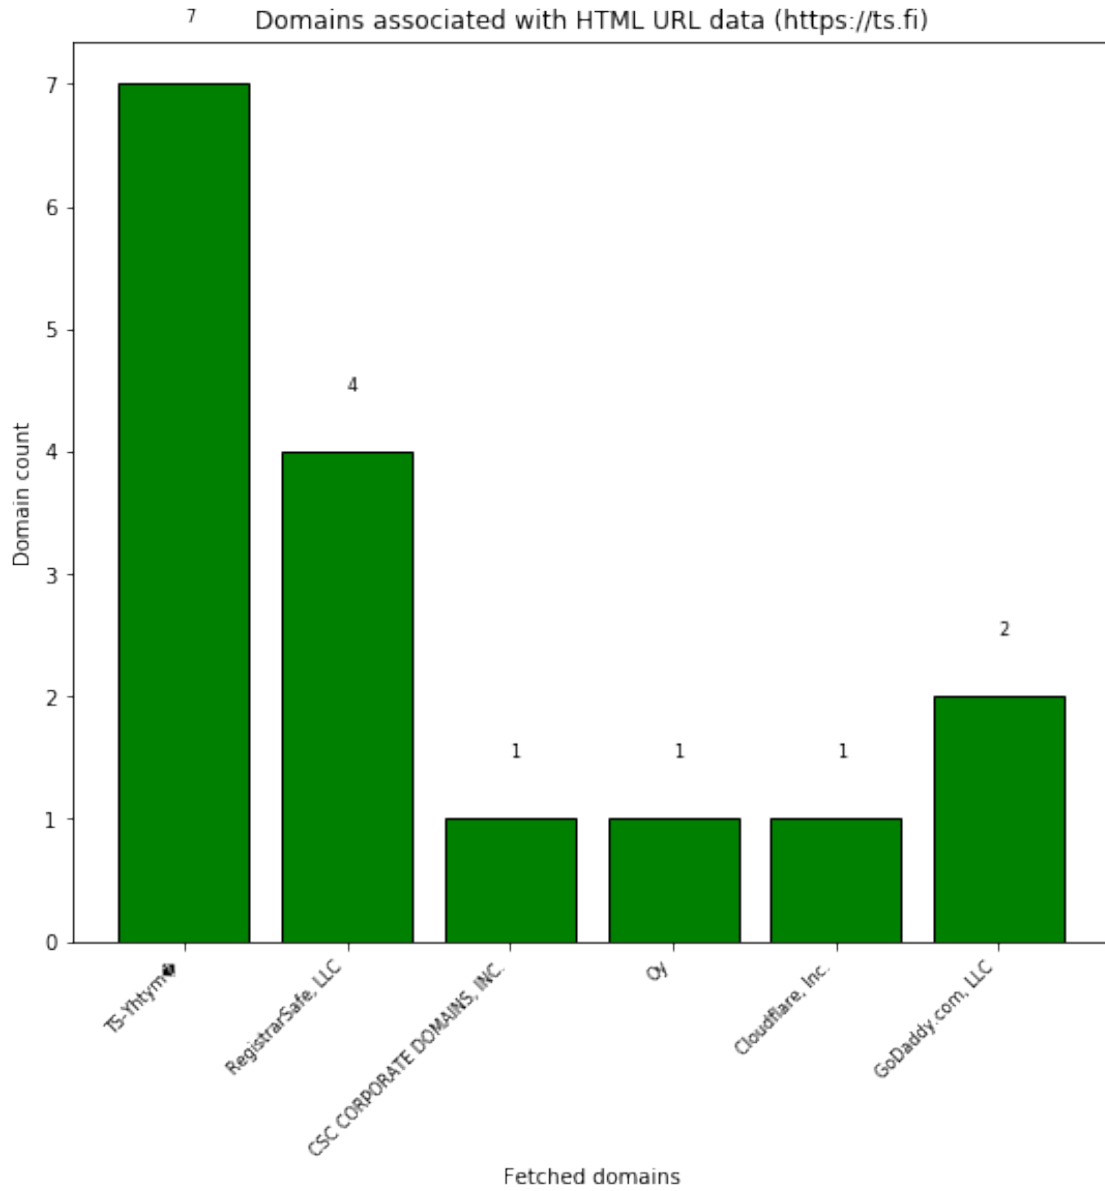

Domains associated with HTML URL data (https://hoxhunt.com/)

Generate statistics: https://hs.fi

Domains associated with HTML URL data (https://hs.fi)

Generate statistics: https://ts.fi

Domains associated with HTML URL data (https://ts.fi)

Generate statistics: https://facebook.com

Domains associated with HTML URL data (https://facebook.com)
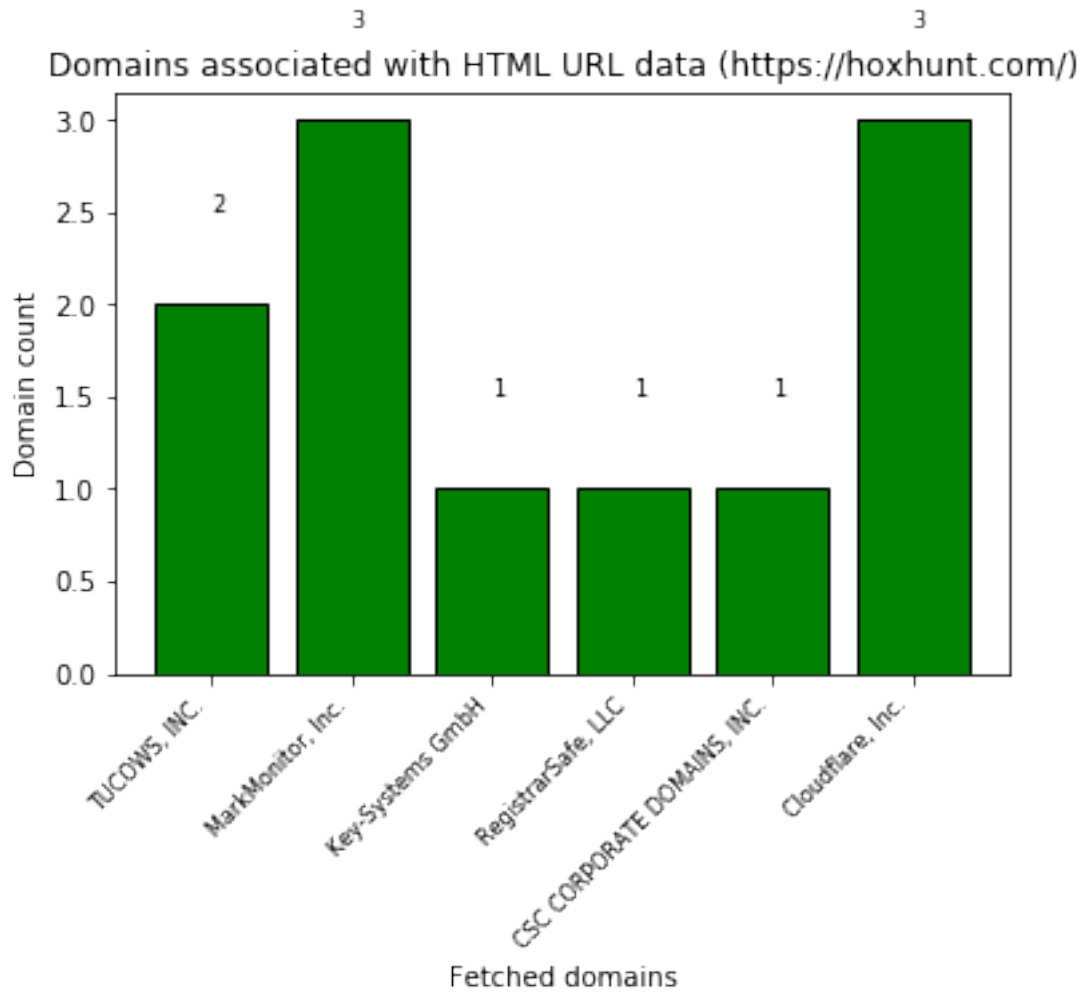

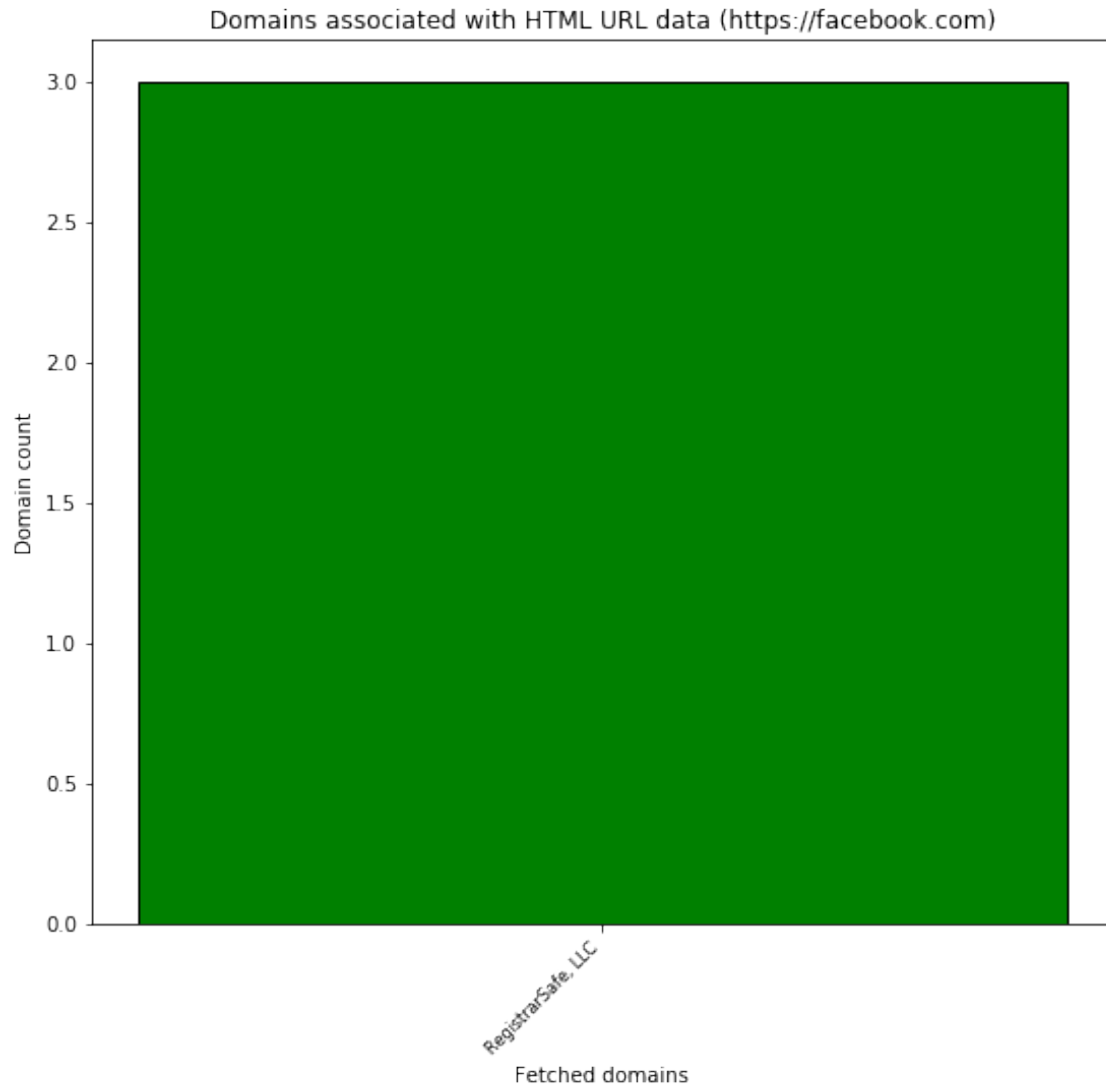

1.1 Analysis

Website	Analysis	Top registrars
HoxHunt	Great variation of different registrars	`MarkMonitor Inc.,` `CloudFlare Inc.`
HS.fi	Average variation of different registrars, relies mostly on its own registrar	`Sanoma`
TS.fi	Great variation of different registrars, uses mostly its own regisrtrar	`TS-Yhtymä Oy`

Website	Analysis	Top registrars
Facebook	Very low variation of different registrars, relies on a single regisrtrar	`RegistrarSafe LLC`
